GO Smart Wi-Fi

Setting up your mesh network

STEP 1

Plug the pod into a power outlet.

STEP 2

Switch off the Wi-Fi of your **GO** modem/router.

*Refer to pages 7 & 8

STEP 3

Connect the pod to your **GO** router/modem using the supplied Ethernet cable.

STEP 4

Wait for the pod to go through the setup process - this can take up to 5 minutes. The indicator lights on the pod will turn green as soon as it is paired to your **GO** modem/router.

STEP 5

Setup the second **GO** Smart Wi-Fi pod in another area of your home by plugging it in to a power outlet. The indicator lights on the pod will turn green as soon as it is paired to your **GO** modem/router.

STEP 6

Connect to your new **GO** Smart Wi-Fi network by using the SSID and password found on the bottom of your **GO** Smart Wi-Fi Pods.

STEP 7

Download the AirTies Vision app from the App Store/Play Store to maximise your experience and set up additional pods.

Switch OFF the Wi-Fi

Smart Hub

Wi-Fi button can be located on the left side of the modem. Wireless LED indicator should turn off when this is disabled.

Technicolor TG789VAC V2

Wi-Fi button located on top, to the right of the LED indicators. Wireless LED indicator should turn off when this is disabled.

MediaAccess TG588v

Wi-Fi button located on top, to the right of the LED indicators. Wireless LED indicator should turn off when this is disabled.

Switch OFF the Wi-Fi

Technicolor TG799vn v2

Wi-Fi button on top, to the left of the LED indicators. Wireless LED indicator should turn off when this is disabled.

MediaAccess TG589vn v3

Wi-Fi button located on front side of modem, below the LED indicators. Wireless LED indicator should turn off when this is disabled.

OPTION 1

Airties Vision app

GO Smart Wi-Fi

Adding additional pods
using the Airties Vision app

This setup process requires you to download the AirTies Vision app on your mobile phone/ tablet.

STEP 1

Download Airties Vision Application which is available for both iOS and Android.

STEP 2

Make sure that the device where you downloaded the Application is connected to the Smart Wi-Fi network.

STEP 3

Access the Application and log in or sign up by following the prompted steps.

STEP 4

Select 'Use current Wi-Fi' option and your account will be officially associated with that particular network. Navigate through the Application to review the features available.

STEP 5

If you would want to add another pod, press the plus (+) sign at the bottom of the screen. **

STEP 6

Choose 'Add an Extender'.

STEP 7

Start with setup and scan the QR code at the back of the device next to the Ethernet connections.

STEP 8

When pod is found, it is added to the network accordingly.

Under **Extenders** you will be able to review the list of available connected pods.

Under **Devices** there will be the list of connected devices.

** To add more pods, you need to repeat from Step 5 to Step 8.

OPTION 2

Manual

GO Smart Wi-Fi

Adding additional pods
manually

STEP 1

Plug the additional pod into a power outlet.

STEP 2

Press the WPS button on the front of the pod connected to the modem for 1-5 seconds. Press the WPS button on the front of the additional pod for 1-5 seconds.

STEP 3

Wait for the pod to go through the setup process - this can take up to 3 minutes.

The indicator lights on the pod will turn green as soon as it is paired to your **GO** modem/router.
