

GO Remote FAQs

What is the use of the GO remote?

The GO remote control can be used with all set-top boxes provided by GO on both DTTV and Interactive TV services. Additionally it is also able to control certain features on a wide range of TV models.

What is the advantage of having the GO remote?

The GO remote control facilitates your GO TV viewing experience by combining the functionalities of all of GO's set-top boxes into one ergonomically designed easy-to-use remote control. You can switch from one set-top box to another seamlessly with assistance from our user-friendly instructions (available on www.go.com.mt/goremote).

Can the GO remote control my TV?

The GO remote control has been designed to control frequently used functions on numerous TV models from different manufacturers. There will be no need to switch to your TV's remote control to adjust the volume anymore. The GO remote can control your TV power, input selection, volume control and mute even while not watching GO TV.

How can I program my GO remote?

Please follow the instructions available on www.go.com.mt/goremote to program the GO remote with your GO set-top box and TV manufacturer.

From where can I obtain the GO remote?

You can buy the remote control from GO outlets at the price of €10.
